HYDROLAB pH Sensor for HL Series Sonde, Standard Reference

de producto:

HLPHSREF

CLP Precio:

Contacto Termodinámica

Llamar para confirmar fecha de envío

The HYDROLAB pH sensor uses a glass bulb measuring electrode and refillable reference electrode, each in their own sonde port. A user-rebuildable reference electrode extends the life of the pH sensor while minimizing costs because the measuring electrode does not necessarily need replacement when the reference electrode is depleted

Especificaciones

*Parámetros medidos:

pH

pH units

Exactitud:	±0.2 pH
Instrumentos compatibles:	HL4 & HL7
Material carcasa:	Glass bulb
Methods:	SM 4500-H Standard Methods for the Examination of Water and Wastewater
Profundidad del rango de medición:	200 m
Rango de medición:	0 - 14 pH
Rango de temperatura de operación:	+23 - +122 °F (-5 - +50 °C), non-freezing
Resolución:	0.01 pH
Sonda de muestra:	Standard Probe
